

Fill Pot, Oxygen Cylinder

Flotec's Oxygen Cylinder Fill Pot provides for a vertically directed release of high-pressure gas in the event of cylinder rupture during cascade transfilling. Manufactured from the highest quality materials, our fill pots employ a solid water jacket barrier between the inner cylinder shell and outer casing.

- 3003 H-22 Tread Plate Aluminum Shell, water tight
- 1/2" Solid 6061-T6511 Extruded Tube
